The session started with why 26th April is celebrated as Intellectual property day all over the world. The session was very interactive and explained the various aspects of Intellectual properties and their importance and was very educational. The session included types of intellectual properties and their legal stature of rights, and was very helpful for the students of engineering domains. The case examples created curiosity among students for patenting their ideas. Faculty members also took interest and it obviously helped them to think in this particular direction. Students learned great things about IPR and entrepreneurship. They learnt how one can go for patenting their idea and becoming a patent holder. The session was full of amazing things to know while going through patenting examples. the sessions will be much appreciated.

## A Report on “Process of Innovation Development & Technology Readiness Level (TRL)”

### Objectives:

1. The main objective of this webinar was to discuss –Generating Ideas, capturing ideas, beginning innovation, developing a business- effectiveness strategy, Applying Business Improvement, and Decline.
2. To inculcate creativity and innovativeness in our students.

### Outcomes:

1. Students were able to understand importance of “Process of Innovation Development & Technology Readiness Level (TRL)”, and its advantages.
2. Students were able to understand the importance of technology assessment.

A webinar on “Process of Innovation Development & Technology Readiness Level (TRL)” was held on 3<sup>rd</sup> March 2022. Mr. Yogesh Karunakar, Head EDC, IAR Labs K. C. College of Engineering was the guest speaker.

In his address Mr. Yogesh Karunakar explained the process of the innovation development and its stages. Citing an example of final year project and keeping users in mind at every stage of process. Mr. Yogesh Karunakar, elaborated the process of technology readiness and commercialisation of the technology. Technology Readiness Levels (TRLs) are a method for understanding the technical maturity of a technology during its acquisition phase. TRLs allow engineers to have a consistent datum of reference for understanding technology evolution, regardless of their technical background.

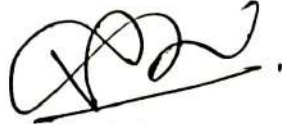

Further, Mr. Yogesh Karunakar explained how the technology transfer from innovator to industry takes place.

The session focussed on the innovation development and understanding technology readiness level, manufacturing readiness level and investment readiness level. A technology assessment is needed to determine the technology is ready or not to be commercialized. An approach has been used to assess the readiness of technology, namely Technology Readiness Level (TRL) adopted from NASA.

Prof. Nirajsingh Yeotikar, welcomed and introduced the speaker while Prof. K. N. Attarde proposed the vote of thanks.
