7.1.3 - Describe the facilities in the Institution for the management of the following types of degradable and non-degradable waste (within 200 words) Solid waste management, Liquid waste management, Biomedical waste management-waste management, Waste recycling system ,Hazardous chemicals and radioactive waste management.

The institute has Solid Waste Management system at three locations where 6x4x3 feet 3 containers are fixed for dumping solid waste. All waste such as waste paper, food and material are refined and make ready in advance organic fertilizer. The valued generation of solid waste in the campus is approximate 3 to 5.5 kg per day from all the departments, canteen, and garden. Minimum 38-45 days are required to complete one cycle of composting.

The Liquid Waste of the campus has provision of septic tanks with an anaerobic environment in the tank which decomposes the waste discharged into the tank. The plumbing wastewater is assembled from different places to the septic tank. Cleaning of Septic tank is done regularly by municipal sludge gathering vehicle. Hazardous Chemicals are kept separately in the laboratory away from the students' reach. Students are made conscious of the hazardous chemicals before utilizing the chemicals.

E-waste of the college is given to the authorized dealers like scrap buyers. They check the useful components of computers like motherboards, SMPS, RAM and reuse it. MOUs has been done between college and the vendors for managing the repair of and various electronic components and refilling of printer cartridges.

Facilities for management of both degradable and non-degradable waste.
