Title: Finite Element Analysis for Engineering Applications using ANSYS Software

Name of Resource Person: Mr. Ashish Vajir

Description:

1. **Objective of Activity:**
   To enrich and manifest students the CAE domain activities of real engineering industries. Through this training course students will come across the applicability of FEA methods and different types of the formulation procedures of real world engineering problems.

2. **Intended Audience:**
   Students were exposed to advanced level analysis techniques of ANSYS software beyond their academics syllabus. There was an improvement in their skills of software analysis and prediction of desirable output of model under applied working conditions. From now on students can easily work in ANSYS software, they were promoted in the basics and applications of Finite Element Methods to solve different types of engineering problems. They have gone through various types of modes of analysis performed on engineering models and some real world practical applications. They became capable to perform analysis and get approximate results, mechanical properties. They were also benefitted in defining extended limits of applied working conditions of different engineering specimens, engineering mechanisms and machine components. Also they got exposure of using ANSYS software for automobile designing and testing of different components like engine, chassis and gearbox etc.

Dear Sir,

We are very glad to thank you for presenting yourself in the Training Program of Finite Element Analysis in ANSYS and being as a Trainer to enrich our students in the programme. Your speech enlightened our faculties and students on applications of Finite Element Methods and different types of engineering problem solutions of FEA in ANSYS.

We always expect the same kind of coordination and cooperation in future.

Thanking you

With best regards

Yours faithfully,
