Institutional Core Values

• Global Competence:

We promote the young minds as the world inheritance through imparting a broad range of knowledge, skills and practice on cutting edge technologies by project-based learning for global competence. The teaching, research activities and mentoring of students endorse holistic and sustainable development towards technical competence across the discipline. The ecosystem stimulates students to communicate their ideas globally and transfer it into proper actions to discover solution for the problems.

• Academic Excellence:

To attain academic excellence, our educational programs initiate knowledge acquisition, international skill sets and professional traits to achieve career advancement, personal enhancement, leadership and service to the mankind. The teaching excellence permeates every aspect of our endeavor setting ambitious academic goals. Students are motivated for revolution in technical learning through innovative approach and for working with others to attract the best minds into the revolution and creation.

• Foster Entrepreneurship:

Entrepreneurship plays an important role in global trade and economy as well as an essential element for the growth of a person and an organization. Fostering entrepreneurship is an important component of education for all segments of the institute. Entrepreneurial motivation strengthens the aspects of personality that drives individuals to become entrepreneurs in their chosen career or occupation.

• Social Responsibility and Professional Ethics:

The institute aligns the educational program to sensitize the local issues and prepares students for interdisciplinary solutions of contemporary issues as the leaders and global citizens. Students learn continually putting efforts to seek the perspectives of others as theirs. The learning environment inculcates the knowledge of being responsible, principled behavior, professional etiquette and respect of all the members of community and society.
