Report on 8 Days Vocational Training on Advance Solid Works Practice

Objectives:

- 1. To encourage the development of creative mechanical design concepts and ideas.
- 2. Identifying the challenges in designing.
- 3. To provide information about advanced mechanical engineering design.

Outcomes:

Participate will be able to ...

- Understand the importance of computer aided design.
- 2. Frame the ideas into actual prototype development.
- 3. Able to grab oppurtunities in machine design.

On 29th December 2022, a Training on Advance SolidWorks Practices was started in Mechanical Engineering Department, Theem College of Engineering in collaboration with Shirsh Technosolutions. The training had been scheduled from 29th December 2022 to 06th January 2023 (only working days).

The 8 days (40 hours) training program concentrated on various design aspects that are needed during mechanical design. The various practical design examples were discussed through extremely grounded and basic ideas. Numerous examples of computer aided design of mechanical elements like shafts, vessels, welding, etc. were explained with their basics.

The following mentioned topics were discussed during training:

- Advanced assembly making with advanced commands (e.g. advanced mate, mating gear contacts)
- Surfacing
- Sheet Metal Working
- SolidWorks Routing
- Weldments
- Geometric Modelling
- SolidWorks Simulation (assembly animation)

Simulation interpretation (e.g. results/ report study and interpretation)

THEEN COLLEGE OF ENGINEER.

At. Village Belegadh, Bolser Chilhar Ros Bolsar (East) Tal. & Dist. Palghar - 401 50:

During question hour session, the enthusiastic participants asked several queries and doubts regarding their personal challenges during various design problems.

Around 30 participants were present in the training from mechanical & automobile departments. Theem College of Engineering, Boisar organized an online National Level Student Development Programme(SDP) from 05th to 9th July 2021on "Recent Trends in Artificial Intelligence and Machine Learning & its Applications". This was a five day SDP in which various related subtopics were discussed in detail by the eminent faculty members from National Institute of Technology, Warangal and some Industrial Experts from the domain. It provided a very beneficial academic environment and very good exposure to the use of Techniques and Technology of AI & ML. The SDP was well-organized by the coordinators Dr. Najmuddin Aamer, HOD, Department of Computer Engineering and Prof. Syed Tanzeem, HOD, Department of IT and was experienced by over 72 participants from different Engineering Colleges all over India.

The SDP was started on 05th July 2021 with a welcome address by Dr. Aqueel A Shah, Principal, Dr. N. K. Rana, Director, & Dr. Suresh Shan, Chairman of CSI Mumbai Chapter addressed the gathering and presented his views on the need of conducting this workshop and motivated them with a special emphasis on Recent Trends in AI & ML which is much of the time devoted to real time applications.

The Day-1hada technical session on the topic of "Introduction to Data Science and Statistical Methods, Regression Models" by Prof. P Radha Krishna, Computer Engg. Dept. NIT, Warangal. He presented an introduction to Data Science, AI & ML and various statistical methods available for the data analysis and its applications to real time problems. This session provided an insight on the various challenges and how to overcome it, which were associated with many data scientists. Overall, it was very much beneficial to the participants.

The Day-2 had the session on "Introduction to Machine Learning, Supervised, Unsupervised Learning Techniques and Decision trees" by Prof. RBV Subramanyam, Chairman, E & ICT Dept. NIT, Warangal. The audiences were mesmerized with the excellent style of black board teaching, the teachers starting from the basics of Machine Learning and going deep into the concept of ML, by giving examples on the real time basis and its solution, using the concept of Decision Tree. A various Supervised and Unsupervised Learning Techniques and taking the different dataset were discussed that made audience easy to remember the concepts very well. It was the one of the best sessions that the participants had through the 5-days of the SDP.

The session started with how to install and configure the R-Programming Studio into the windows and Linux operating systems. The session also had the exposure to the basic concepts on use of different data types used in R-Programming, use of variables, representation of different data types and implementation of real time problems on the R-programming environment. He presented what all the aspects we need to follow while starting as a programming. He also explained how best we can utilize the freely available libraries and use it our projects.

The Day-4 had the session on "Feature Representation, Ensemble Methods, Real Time Applications" by Dr M. Srinivas, Computer Engg. Dept. NIT, Warangal. At the start of the session, he explained how to start with finding the real time problems and get the research gaps and ways and means to solve the problems which could be implemented using the AI & ML techniques available. Later on, he presented the various techniques on representation of features, computer representation, feature reduction techniques and solving the real time problems using the algorithms and optimization techniques of AI & ML.

The Day-5 had two more sessions in which the first session was conducted by Dr. Ijjina Earnest Paul, NIT Warangal who presented audience various algorithms used for Machine Vision and its implementation, and analysis by using different case studies which he currently pursues at NIT, Warangal. In the second session, Mr. Ali Mustafa, Student Program Manager, Postman API, India presented the Application of AI & ML for API Development and demonstrated the use of AI and ML for developing API for various search by taking different image searches and finding it on the World Wide Web (www).

A valedictory session was arranged online in the presence of chief Guest, Dr. J.W. Bakal, President IETE, India, the Principal, the Director and the Trustee. Dr. J.W. Bakal emphasized on improving the quality of Teaching-Learning Process and delivering the concepts in a lucid manner to the students. He also highlighted on the need to get involved into taking up research activities at different levels. All others motivated the participants to utilize the learned things to deliver their lectures with full of confidence and utilize it for the mankind by means of its implementation to the real time problems. The participants expressed their pleasure on learning the techniques, tools, concepts, algorithms which were available but not much known to them.

they explored and learned those things. Some participants gave their feedback and

expressed their overwhelming response to attend these kinds of workshops in near future

Student Development Program Report: "AWS Cloud Learning"

The 5 days SDP (21st June 2022 to 25th June 2022) is aimed at empowering students with essential knowledge and skills in cloud computing, particularly focusing on Amazon Web Services (AWS). This report outlines the objectives, outcomes, and key topics covered during the program.

Objectives:

- Provide students with a foundational understanding of cloud computing concepts and principles.
- 2. Familiarize students with the core services and infrastructure offered by AWS.
- Address security concerns related to cloud computing and introduce best practices for securing data on AWS.
- Enable participants to gain practical experience through hands-on labs and exercises on the AWS platform.
- 5. Explore strategies for integrating AWS Cloud concepts into existing academic curricular.

Outcomes:

Participate will be able to ...

- Enhanced Cloud Literacy: Participants gained a comprehensive understanding of cloud computing concepts, allowing them to effectively communicate these ideas to students.
- AWS Certification Readiness: Students are now better prepared to pursue the AWS Certified Cloud Practitioner certification, aligning with industry demands.
- Practical Skill Development: Through hands-on labs, students acquired practical skills in utilizing AWS services, enabling them to demonstrate real-world applications.

On 21st June 2022, A 5 Days Student Development Program on "AWS Cloud Learning" was conducted by Information Technology Engineering Department Theem College of Engineering. The SDP had been scheduled from 21st June 2022 to 25th June 2022 (only working days).

THEEM COLLEGE OF ENGINEERING

Success through quality education!

The following topics were discussed during SDP:

Introduction to Cloud Computing:

- · Definition and characteristics of cloud computing
- · Cloud service models: IaaS, PaaS, SaaS
- · Cloud deployment models: Public, private, hybrid

AWS Fundamentals:

- · Overview of AWS global infrastructure
- Core AWS services: EC2, S3, RDS
- · AWS pricing models and cost management

Cloud Security:

- Encryption and data protection on AWS
- · Security best practices and compliance on the cloud

Hands-on Labs:

- · Setting up an EC2 instance
- · Configuring S3 buckets and permissions
- · Implementing IAM roles and policies

Conclusion: The Student Development Program on "AWS Cloud Learning" successfully equipped educators with the knowledge and skills needed to integrate cloud computing concepts. The outcomes reflect a commitment to enhancing both the theoretical understanding and practical application of AWS Cloud technologies in academic settings. The students are now better positioned to prepare for the dynamic and evolving landscape of cloud computing.

During question hour session, the enthusiastic participants asked several queries and doubts regarding their personal challenges during various practical problems. Around 113 participants were present in the SDP. It was a good learning experience for the students.

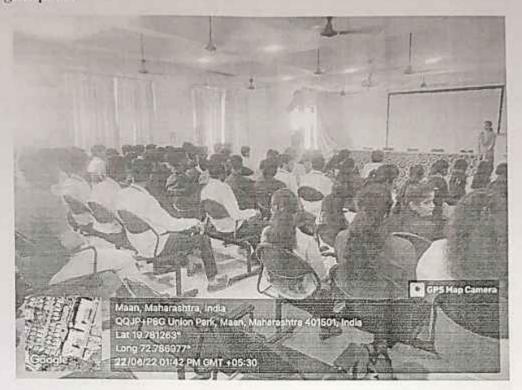

The Resource person was Mrs. Vidya Kawtikwar and Mrs. Sanketi Raut. The Event Coordinator of the SDP was Prof. Sonali Karthik and the Event convener was Prof. Sneha Sankhe, HOD, IT Dept. The program was concluded with Vote of thanks delivered by Prof. Sneha Sankhe.

Campus Credential

Our Expertise:

What Do we Do?

Campus Credential (CC) is a forerunner in the education and training sector since its inception. CC has successfully trained more than 16,000 students each year with a success rate of more than 90%. The philosophy of the company has always been student-centric rather than profit-centric, which makes CC the ideal choice for students.

Campus Credential has trained students for Campus Recruitment Training (CRT) in institutes all over Mumbai and Maharashtra. About 90% of the engineering colleges in Mumbai, including NMIMS, Saboo Siddik, Thakur, RAIT, Amity University, KJ Somaiya, Rajiv Gandhi, St. Francis, and Pune Campus including D.Y,PATIL (Akrudi Campus), PCCOE Pune many more are associated with CC as their training partner. With its dynamic course that is constantly updated according to the ever changing industry standards, CC has gained the trust and long-term associations with many reputed engineering institutes.

Campus Credential specializes in MBA entrance exam and other competitive exams training, including CAT, XAT, IIFT, SNAP, NMAT, CET, Bank PO, etc. CampPAT, the unique training module designed by CC, is an innovative learning concept that enables students to crack these exams more efficiently. Camp Test Series is an e-learning module designed to help students learn concepts without classroom training.

Campus Credential also trains students for GRE, GMAT, TOEFL, IELTS, etc. along with personalized counselling that enables students to plan and execute their further studies outside India. CC helps them during the entire process with the best mentors and counsellors to ensure a smooth transition for the student.

Campus Credential has designed their own testing platform, training modules and course materials, which enables them to update and upgrade regularly. The trainers and mentors are highly experienced with the credentials to match. With a track record to PRINCIPAL

Course Objective:

- ✓ Skill enhancement: Ensuring students receive the best skill-sets to have a better transition from campus to corporate.
- ✓ Employability skills: To increase their employability value to ensure success in their future endeavours.
- Skilled Professionals: To help students not just pass out as graduate but skilled professionals.

Need for the Course:

While only 8% of youth is unemployed, 53% have some kind of skill deprivation. This becomes critical as 90% of jobs in India are skill based. Youth employability is a bigger crisis than unemployment as poor-quality skills or education show up in low incomes rather than unemployment. 58% of graduates make less than Rs. 75,000 per year. (Source: https://timesofindia.indiatimes.com/business/india-business/Indian-youth-are-simply-unemployable-Report/articleshow/2526720.cms).

The above study clearly bring to the forefront the need of skills enhancement in the youth of the nation today. Gone are the days when securing good marks is all you needed to get a good job. Corporates have understood that although the students may have gained some subject knowledge, but the application part along with some basic soft skills are completely missing in these students. Hence, corporates have come up with proper recruitment processes that will filter out the candidates that possess the skill-sets the company requires. They are checking nothing but the employability of the students, which sadly it is quite low in our nation.

Without proper training and education regarding these skills, the students may face higher outcomes of rejection than what we hope for. This may also result in the students settling for jobs that offer subpar profiles and lower incomes. Our students have a right to better jobs and basic skill-sets which can be provided to them through these courses.

BOISAR GINEER

THEEN COLLEGE OF ENGINEERING

These skill-sets should not be the barrier between them and a potential job opportunity. Employability skills is the need of the hour and we should aim to enhance it with these courses.

Our Objective:

Our objective is to ensure our youth are employable. To make the students employable, we have to impart certain skills to the students that the corporates require. The subject knowledge is very efficiently provided by the colleges and universities they study in, but the other skills like decision making, time management, people management, negotiation skills, etc. are something that is not taught in a classroom and so our students are lacking in these basic skills.

According the latest LinkedIn reports, 57% of senior leaders today say that soft skills are more important than hard skills for their business today. The skills that the companies are looking for most are Creativity, Persuasion & Negotiation skills, Teamwork, Change Management & Adaptability, Time management, Analytical Reasoning & Decision Making, People Management, Sales and Corporate Communications. (Source: https://learning.linkedin.com/blog/top-skills/the-skills-companies-need-most-in-2019--and-how-to-learn-them)

Our courses have been designed based on these latest inputs. The course design is created to inculcate these skills that the corporates need. Student betterment and employability are the main objectives of these courses. We hope to create not just graduates but skilled graduates who can grab the best opportunities.

Title: Finite Element Analysis for Engineering Applications using ANSYS Software

Name of Resource Person: Mr. Ashish Vajir

Description:

1. Objective of Activity:

To enrich and manifest students the CAE domain activities of real engineering industries. Through this training course students will come across the applicability of FEA methods and different types of the formulation procedures of real world engineering problems.

2. Intended Audience:

Students were exposed to advanced level analysis techniques of ANSYS software beyond their academics syllabus. There was an improvement in their skills of software analysis and prediction of desirable output of model under applied working conditions. From now on students can easily work in ANSYS software, they were promoted in the basics and applications of Finite Element Methods to solve different types of engineering problems. They have gone through various types of modes of analysis performed on engineering models and some real world practical applications. They became capable to perform analysis and get approximate results, mechanical properties. They were also benefitted in defining extended limits of applied working conditions of different engineering specimens, engineering mechanisms and machine components. Also they got exposure of using ANSYS software for automobile designing and testing of different components like engine, chassis and gearbox etc.

Title: Finite Element Analysis for Engineering Applications using ANSYS Software

Name of Resource Person: Mr. Ashish Vajir

Description:

1. Objective of Activity:

To enrich and manifest students the CAE domain activities of real engineering industries. Through this training course students will come across the applicability of the method and different types of the formulation procedures of real world engineering problems.

2. Intended Audience:

Students were exposed to advanced level analysis techniques of ANSYS software beyond their academics syllabus. Improvement in their skills of software analysis and prediction of desirable output of model under applied working conditions. From now on students can easily work in ANSYS software, they were promoted in the basics and applications of Finite Element Methods to solve different types of engineering problems. They have gone through various types of modes of analysis performed on engineering models and some real world practical applications. They became capable to perform analysis and get approximate results, mechanical properties. They were also benefitted in defining extended limits of applied working conditions of different engineering specimens, engineering mechanisms and machine components. Also they got exposure of using ANSYS software for automobile designing and testing of different components as like engine, chassis and gearbox etc.
