The students shared their experience and ideas. The speaker also conducted some fun interactive activities as well wherein he made the students understand that if we don't have much knowledge and experience about a specific thing say Cryptocurrency, we should invest small so that the risk would not be much and the amount of loss won't be much high as well. Through his speech he helped the students to think more like an Entrepreneur by focusing on things like Opportunity Recognition, Comfort with risk, Creativity, Innovation, Critical Thinking and Problem solving.

Session 2: Webinar on “Innovation Driven Entrepreneurship” by Mr. Santosh Khawale. Mr. Santosh D. Khawale, the speaker gave a wonderful session where he shared what entrepreneurship is and how innovation can play a magical role in entrepreneurship. He mentioned entrepreneurship is thought to be a key driver of economic growth. While there are myriad forms of entrepreneurship, ranging from self-employment to small and medium size enterprises to technology- and innovation-driven startups, recent research provides evidence that the relationship between entrepreneurship and economic growth is driven not by overall quantity of new firm entry, but rather by a small subset of high growth startups that are primarily categorized as innovation-driven. He defined Innovation Driven Entrepreneurship (IDE) as the pursuit of opportunities focused on products or repeatable services beyond the local market. Making a bold statement Mr. Santosh D. Khawale said we need more than just more start-ups who create low paying jobs. We need businesses that brings innovations to market that deliver such high value that customers are willing to pay a margin premium. This is what he was calling innovation driven entrepreneurship or innovation driven start-ups. These start-ups don't have to follow in the model of Silicon Valley and be focused on technology. Innovations can cover a wide range of areas. He gave example of innovating education and how students can be prepared with STEM skills that will prepare them to compete in the emerging creative economy.

Report on 8 Days Vocational Training on Advance Solid Works Practice

Objectives:

1. To encourage the development of creative mechanical design concepts and ideas.
2. Identifying the challenges in designing.
3. To provide information about advanced mechanical engineering design.

Outcomes:

Participants will be able to...

1. Understand the importance of computer aided design.
2. Frame the ideas into actual prototype development.
3. Able to grab opportunities in machine design.

On 29th Decemeber 2022, a **Training on Advance SolidWorks Practices** was started in Mechanical Engineering Department, Theem College of Engineering in collaboration with Shirsh Technosolutions. The training had been scheduled from 29th December 2022 to 06th January 2023 (only working days).

The 8 days (40 hours) training program concentrated on various design aspects that are needed during mechanical design. The various practical design examples were discussed through extremely grounded and basic ideas. Numerous examples of computer aided design of mechanical elements like shafts, vessels, welding, etc. were explained with their basics.

The following mentioned topics were discussed during training:

- Advanced assembly making with advanced commands (e.g. advanced mate, mating gear contacts)
- Surfacing
- Sheet Metal Working
- SolidWorks Routing
- Weldments
- Geometric Modelling
- SolidWorks Simulation (assembly animation)
- Simulation interpretation (e.g. results/ report study and interpretation)

In addition to this, the institute has the 240 intake in the Diploma Engineering programmes of Computer, Mechanical, Civil and Electrical Engg. The institute well maintained infrastructure, rich academic excellence in Teaching Learning echo system steers students to achieve their career goals. To enhance multi-tasking growth, the institute equally focuses on co-curricular and extra-curricular activities which yielded university rank holders and winners of various technical and sports events.

About the Department:

The Department of Computer Engg. and Information Technology was formed with the primary objective of providing quality education in the field of Technology. Right from its inception, the Department has been offering excellent infrastructural facilities with a variety of computing platforms to assisting IT students to meet the rapidly increasing demands of the IT industry. Importance is given to quality teaching and learning process through faculty development programs for teachers and soft skill programmes for students.

About the Course:

Machine Learning (ML) is the scientific study of algorithms and statistical models that computer systems use to perform a specific task without using explicit instructions, relying on patterns and inference instead. The purpose of Machine Learning is to discover patterns in the data and then make predictions based on often complex patterns to answer business questions, detect and analyze trends and help solve problems. Machine Learning is effectively a method of data analysis that works by automating the process of building data models.

Topics to be covered:

- Introduction to AI, Data Science & Statistical Methods.
- Regression Models
- Introduction to Machine Learning, Supervised,
- Unsupervised Learning Techniques and
- Decision trees, R-programming, Feature
- Representation, Ensemble Methods,
- Real Time Applications,
- Dimensionality Reduction Method,
- Unsupervised Learning Methods & its applications.

Objectives of the SDP:

- To equip students with skills and knowledge in the field of AI and Machine Learning, this is essential for inculcating learning values in students and guiding & monitoring their progress towards their career.
- To make the faculties to train the students to create interest towards the field of AI & Machine Learning and also familiarize the students with the practical aspects of this field and gradually reach them the industrial usage of Machine Learning and its various applications.

Certification:

A quiz shall be conducted by the coordinator at the end of the program. The certificate is likely to be issued by AICTE-AIAT to those participants who have attended the program with 80% attendance and scored minimum 60% marks in the test.

Report of One Week Online Student Development Programme

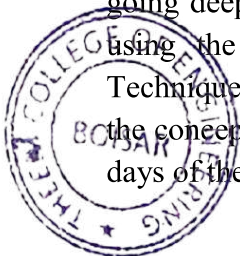

Recent Trends in Artificial Intelligence and Machine Learning (AT & ML) & its Applications

Theem College of Engineering, Boisar organized an online **National Level Student Development Programme (SDP)** from **05th to 9th July 2021** on **“Recent Trends in Artificial Intelligence and Machine Learning & its Applications”**. This was a five day SDP in which various related subtopics were discussed in detail by the eminent faculty members from **National Institute of Technology, Warangal** and some **Industrial Experts** from the domain. It provided a very beneficial academic environment and very good exposure to the use of Techniques and Technology of AI & ML. The SDP was well-organized by the coordinators Dr. Najmuddin Aamer, HOD, Department of Computer Engineering and Prof. Syed Tanzeem, HOD, Department of IT and was experienced by over 72 participants from different Engineering Colleges all over India.

The SDP was started on **05th July 2021** with a welcome address by Dr. Aqueel A Shah, Principal, Dr. N. K. Rana, Director, & Dr. Suresh Shan, Chairman of CSI Mumbai Chapter addressed the gathering and presented his views on the need of conducting this workshop and motivated them with a special emphasis on **Recent Trends in AI & ML** which is much of the time devoted to real time applications.

The Day-1 had a technical session on the topic of **“Introduction to Data Science and Statistical Methods, Regression Models”** by Prof. P Radha Krishna, Computer Engg. Dept. NIT, Warangal. He presented an introduction to Data Science, AI & ML and various statistical methods available for the data analysis and its applications to real time problems. This session provided an insight on the various challenges and how to overcome it, which were associated with many data scientists. Overall, it was very much beneficial to the participants.

The Day-2 had the session on **“Introduction to Machine Learning, Supervised, Unsupervised Learning Techniques and Decision trees”** by Prof. RBV Subramanyam, Chairman, E & ICT Dept. NIT, Warangal. The audiences were mesmerized with the excellent style of black board teaching, the teachers starting from the basics of Machine Learning and going deep into the concept of ML, by giving examples on the real time basis and its solution, using the concept of Decision Tree. A various Supervised and Unsupervised Learning Techniques and taking the different dataset were discussed that made audience easy to remember the concepts very well. It was the one of the best sessions that the participants had through the 5-days of the SDP.

The session started with how to install and configure the R-Programming Studio into the windows and Linux operating systems. The session also had the exposure to the basic concepts on use of different data types used in R-Programming, use of variables, representation of different data types and implementation of real time problems on the R-programming environment. He presented what all the aspects we need to follow while starting as a programming. He also explained how best we can utilize the freely available libraries and use it our projects.

The Day-4 had the session on “**Feature Representation, Ensemble Methods, Real Time Applications**” by Dr M. Srinivas, Computer Engg. Dept. NIT, Warangal. At the start of the session, he explained how to start with finding the real time problems and get the research gaps and ways and means to solve the problems which could be implemented using the AI & ML techniques available. Later on, he presented the various techniques on representation of features, computer representation, feature reduction techniques and solving the real time problems using the algorithms and optimization techniques of AI & ML.

The Day-5 had two more sessions in which the first session was conducted by **Dr. Ijjina Earnest Paul**, NIT Warangal who presented audience various algorithms used for Machine Vision and its implementation, and analysis by using different case studies which he currently pursues at NIT, Warangal. In the second session, **Mr. Ali Mustafa**, Student Program Manager, Postman API, India presented the Application of AI & ML for API Development and demonstrated the use of AI and ML for developing API for various search by taking different image searches and finding it on the World Wide Web (www).

Our Expertise:

What Do we Do?

Campus Credential (CC) is a forerunner in the education and training sector since its inception. CC has successfully trained more than 16,000 students each year with a success rate of more than 90%. The philosophy of the company has always been student-centric rather than profit-centric, which makes CC the ideal choice for students.

Campus Credential has trained students for Campus Recruitment Training (CRT) in institutes all over Mumbai and Maharashtra. About 90% of the engineering colleges in Mumbai, including NMIMS, Saboo Siddik, Thakur, RAIT, Amity University, KJ Somaiya, Rajiv Gandhi, St. Francis, and Pune Campus including D.Y.PATIL (Akrudi Campus), PCCOE Pune many more are associated with CC as their training partner. With its dynamic course that is constantly updated according to the ever changing industry standards, CC has gained the trust and long-term associations with many reputed engineering institutes.

Campus Credential specializes in MBA entrance exam and other competitive exams training, including CAT, XAT, IIFT, SNAP, NMAT, CET, Bank PO, etc. CampPAT, the unique training module designed by CC, is an innovative learning concept that enables students to crack these exams more efficiently. Camp Test Series is an e-learning module designed to help students learn concepts without classroom training.

Campus Credential also trains students for GRE, GMAT, TOEFL, IELTS, etc. along with personalized counselling that enables students to plan and execute their further studies outside India. CC helps them during the entire process with the best mentors and counsellors to ensure a smooth transition for the student.

Campus Credential has designed their own testing platform, training modules and course materials, which enables them to update and upgrade regularly. The trainers and mentors are highly experienced with the credentials to match. With a track record to

Course Objective:

- ✓ Skill enhancement: Ensuring students receive the best skill-sets to have a better transition from campus to corporate.
- ✓ Employability skills: To increase their employability value to ensure success in their future endeavours.
- ✓ Skilled Professionals: To help students not just pass out as graduate but skilled professionals.

Need for the Course:

While only 8% of youth is unemployed, 53% have some kind of skill deprivation. This becomes critical as 90% of jobs in India are skill based. Youth employability is a bigger crisis than unemployment as poor-quality skills or education show up in low incomes rather than unemployment. 58% of graduates make less than Rs. 75,000 per year. (Source: <https://timesofindia.indiatimes.com/business/india-business/Indian-youth-are-simply-unemployable-Report/articleshow/2526720.cms>).

The above study clearly bring to the forefront the need of skills enhancement in the youth of the nation today. Gone are the days when securing good marks is all you needed to get a good job. Corporates have understood that although the students may have gained some subject knowledge, but the application part along with some basic soft skills are completely missing in these students. Hence, corporates have come up with proper recruitment processes that will filter out the candidates that possess the skill-sets the company requires. They are checking nothing but the employability of the students, which sadly it is quite low in our nation.

Without proper training and education regarding these skills, the students may face higher outcomes of rejection than what we hope for. This may also result in the students settling for jobs that offer subpar profiles and lower incomes. Our students have a right to better jobs and basic skill-sets which can be provided to them through these courses.

PRINCIPAL
THEEM COLLEGE OF ENGINEERING
At. Village Betegaon, Boisar Chithar Road
Boisar (East) Tal. & Dist. Palohar - 400

These skill-sets should not be the barrier between them and a potential job opportunity. Employability skills is the need of the hour and we should aim to enhance it with these courses.

Our Objective:

Our objective is to ensure our youth are employable. To make the students employable, we have to impart certain skills to the students that the corporates require. The subject knowledge is very efficiently provided by the colleges and universities they study in, but the other skills like decision making, time management, people management, negotiation skills, etc. are something that is not taught in a classroom and so our students are lacking in these basic skills.

According the latest LinkedIn reports, 57% of senior leaders today say that soft skills are more important than hard skills for their business today. The skills that the companies are looking for most are Creativity, Persuasion & Negotiation skills, Teamwork, Change Management & Adaptability, Time management, Analytical Reasoning & Decision Making, People Management, Sales and Corporate Communications. (Source: <https://learning.linkedin.com/blog/top-skills/the-skills-companies-need-most-in-2019--and-how-to-learn-them>)

Our courses have been designed based on these latest inputs. The course design is created to inculcate these skills that the corporates need. Student betterment and employability are the main objectives of these courses. We hope to create not just graduates but skilled graduates who can grab the best opportunities.

Flutter Tutorial

Flutter

As a mobile developer, what do you expect from your application development?

Obviously

- Lot of options for beautiful design.
- Butter smooth animations.
- Great Performance.
- Also you would like to target as many platforms as possible from your single code base.
- Prototyping features in less time.

If you are looking for an SDK that can do all these, Flutter is the best option.

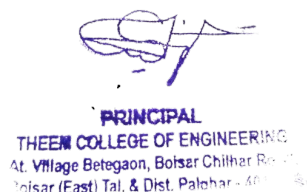

Following are some of the features of Flutter.

- Flutter is developed by Google.
- Free and Open Source.
- Flutter is happy to work with your existing code in Java, Swift, ObjC etc.
- Flutter makes single code base possible for both IOS and Android applications.
- Flutter helps build high-quality native interfaces to Android and IOS.
- With Flutter, time required for Application Development is relatively less, at the same time not compromising on performance or design.
- Hot Reload makes your Application Development fast than ever.
- Flutter has built-in Material Design (for Android) and Cupertino (for iOS).
- Flutter is a reactive framework like React from Facebook.

Flutter Development IDEs

You can develop Flutter application using any of the following IDEs.

- Android Studio
- IntelliJ IDEA
- Visual Studio Code
- Xcode

Flutter uses Dart programming language for developing applications. To learn Dart follow [Dart Tutorial](#).

[Flutter on Different Platforms](#)

Flutter adopts the physics and behavior of applications corresponding to the target platform. Scroll behavior, navigation, icons, fonts are some of those that Flutter shows differently on different platforms like Android and IOS.

[Flutter for Beginners](#)

You can start right away to deliver fast and modern native apps.

[Flutter for Existing Mobile Application Developers](#)

You can integrate Flutter with your existing code.

Type of Activity: Training

Title: Finite Element Analysis for Engineering Applications using ANSYS Software

Name of Resource Person: Mr. Ashish Vajir

Description:

1. Objective of Activity:

To enrich and manifest students the CAE domain activities of real engineering industries. Through this training course students will come across the applicability of FEA methods and different types of the formulation procedures of real world engineering problems.

2. Intended Audience:

Students were exposed to advanced level analysis techniques of ANSYS software beyond their academics syllabus. There was an improvement in their skills of software analysis and prediction of desirable output of model under applied working conditions. From now on students can easily work in ANSYS software, they were promoted in the basics and applications of Finite Element Methods to solve different types of engineering problems. They have gone through various types of modes of analysis performed on engineering models and some real world practical applications. They became capable to perform analysis and get approximate results, mechanical properties. They were also benefitted in defining extended limits of applied working conditions of different engineering specimens, engineering mechanisms and machine components. Also they got exposure of using ANSYS software for automobile designing and testing of different components like engine, chassis and gearbox etc.

Dear Sir,

We are very glad to thank you for presenting yourself in the Training Program of Finite Element Analysis in ANSYS and being as a Trainer to enrich our students in the programme. Your speech enlightened our faculties and students on applications of Finite Element Methods and different types of solutions to the engineering problems of FEA in ANSYS.

We always expect the same kind of coordination and cooperation in future.

Thanking you

With best regards

Yours faithfully,

Type of Activity: Training

Title: Finite Element Analysis for Engineering Applications using ANSYS Software

Name of Resource Person: Mr. Ashish Vajir

Description:

1. Objective of Activity:

To enrich and manifest students the CAE domain activities of real engineering industries. Through this training course students will come across the applicability of the method and different types of the formulation procedures of real world engineering problems.

2. Intended Audience:

Students were exposed to advanced level analysis techniques of ANSYS software beyond their academics syllabus. Improvement in their skills of software analysis and prediction of desirable output of model under applied working conditions. From now on students can easily work in ANSYS software, they were promoted in the basics and applications of Finite Element Methods to solve different types of engineering problems. They have gone through various types of modes of analysis performed on engineering models and some real world practical applications. They became capable to perform analysis and get approximate results, mechanical properties. They were also benefitted in defining extended limits of applied working conditions of different engineering specimens, engineering mechanisms and machine components. Also they got exposure of using ANSYS software for automobile designing and testing of different components as like engine, chassis and gearbox etc.
